

REPORT DRAFT: F-35 Joint Strike Fighter Aircraft "Superior Supplier Pilot Project": Major Initiatives & Contract Quote Risk Assessment

Section I: INTRODUCTION TO PROJECT INITIATION

Section II: SUPPLY LOGISTICS ACCOUNTABILITY

Section III: SUPPLY TRACKING RISK IDENTIFICATION

Section IV: BARRIERS TO CONTRACT QUOTE SUSTAINMENT

Section V: ASSET VALUE RETENTION/DEPLETION

Section VI: TREATMENT OF SUPPLY DISCREPANCIES

Section VII: CAPITAL INVESTMENT MECHANISMS

Section VIII: SUBSTITUTE SUPPLY COMPONENTS

Section IX: CREDIT DETERMINATION & ALLOCATION

Section X: SUPPLY TYPE UNIT RISK FACTORS

Section XI: CONTRACT CONTINGENCIES & RENEGOTIATIONS

Section XII: CONTRACT AWARD SURVEYS ADMINISTRATION

Section XIII: SUPPLY CONTRACT INTERPRETATIONS

Coordinated efforts have been designed to kick start F-35 project initiation reports defining contract quote reviews addressing contingency operations at F-35 supplier facilities.

Initial reports have made explicit the dispatch of equipment parts tracking tech available to F-35 suppliers during a delivery crisis resulting from interactions between F-35 delivery systems & contract quotes.

These relationships are characterised by the variable size, quantity & quality of F-35 deliveries during revolving periods of key physical, technical & fiscal factors at the point in time contract quote terms are finalised

Competing claims between equipment parts suppliers have led to F-35 delivery cancellation/postponement due to cash flow problems, reticence to part w/ capital over lengthy periods of time & project conclusions derived from assessing F-35 stock delivery.

During F-35 deliveries to date, international interest in pursuing acquisition rights have raised questions as to what extent access to equipment parts tracking tech is driven by strategic national interest versus actions of multi-national F-35 suppliers in pursuit of profits & distribution rights in meeting force structure requirements.

Project dispatchers have demonstrated a proven track record of advancing national objectives & commitments to domain expansion of F-35 delivery frequencies related to process control & asset tracking identification codes functioning to administer the contents of infrastructure portfolios & access to equipment parts supply tracking tech.

EDIT IN PROGRESS.....
